XNO.BET EOM Competition Rules & Guidelines dated 2/05/2023

These rules and guidelines are subject to change, by entering the competition via confirmation of your entry fee - you agree to these rules and guidelines.

1. You may enter the competition from the 1st to the 7th of each month.

   a. During this period, participants may guess what they predict the price of XNO will be on the last day of the month.

      - This prediction must be unique; it cannot match any other entry that has already been submitted.

   b. A participant may submit only one guess.

   c. A guess must have no more than 3 decimal places.

   d. Once a guess is submitted, you may not get a refund.

   e. The winner must meet either of these 2 criteria:

      ★ The participant submitted a guess that is the exact price of XNO at the end of the month.

         - EOM uses the CoinGecko API to determine the price of <u>XNO/USD.</u> This information is available from 4:55AM – 5:05AM UTC on the last day of the month.

      ★ The participant submitted a guess that is closest to the actual price of XNO at the end of the month.

         - It is possible for more than two players to win the competition if both guesses are the same distance to the actual price of XNO at the end of the month (ex: +0.01 or -0.01). In this situation, the prize pool is divided equally.

      f. Participants are always able to view the current rankings on the home page of xno.bet to see if they have the closest or exact match to the current price of XNO/USD.

2. A participant must guess the exact price of XNO in order to win the full amount in the pool. If the submitted guess is not an exact price match, then the competition winner(s) will receive 66% of the prize pool for that month. The remaining 34% will be added to the following month's competition prize pool.

3. Once the competition is completed, the winner(s) is determined, a snapshot gets taken of the month to be used for historical reference in the transparency page. The winnings

are then sent to the address of the participant.

★ The payout of the prize might take up to 2 days so that the integrity of the process may be ascertained.

★ Proxy addresses are not allowed. The server will reject any submission made via a proxy address. This is in order to maintain the integrity of the process and prevent multiple submissions by an individual.

4. Due to the volatility of XNO/USD pair, it is not guaranteed that you will win as the price fluctuates due to larger uncontrollable economic factors like speculation, sentiment, market forces, etc.…

XNO EOM Competition Entry Fee & Reward Amount Guidelines:

- The current entry fee allocation:

  o 50% to increase current available reward.
  o 25% to help with expenses for maintenance & operations.
  o 15% to fund XNO community initiatives.
